Water: Water is a colorless, tasteless liquid that we drink to live. We know another name of water is life. We can't live without water. We also use water for washing, bathing, cooking etc.

Figure: Glass of water

Sources of water:

Rain: Rain is our main source of water. Rain water also fills up ponds, lakes, streams, rivers and seas. We use these sources of water for our various needs.

Figure: Rain water fills up the ponds
