1.Sources of water

Sources of water can be classified into two groups. Those are:

a) Natural source:

When we get water from natural sources then we called it a natural source of water. Such as sea, river, lake, and rain.

b) Man-made source:

When we get water from a man-made source then we called it a man-made source of water. Such as well, tube-well, tap and pond water, etc.

2. Uses of water:

We use water in every aspect of our life, such as

- a) We drink water when we are thirsty.
- b) We use water for cooking food.
- c) People use water for washing their clothes.
- d) We use water for industrial purpose.
- e) We use water for growing crops.
- f) Water is also used for fish farming.

Saving of water:

Water is our natural resource we can save water in many ways. Example:

- a) We can turn off water tap while brushing our teeth.
- b) We should not waste water while washing our clothes.
- c) We can recycle, reduce and reuse our water of resource.
- d) We should create public awareness for reducing the use of water.
- e) We should not allow children to play when with water.
