**Chapter-13 Natural Resources**

**Revision Sheet- Answer**

1.

Answer: Five man-made resources are:

- a) Paper
- b) Plastic
- c) Glass
- d) Electricity
- e) House

2.

Answer: Three alternatives to non-renewable resources are:

- a) Sunlight
- b) Wind
- c) Water

3.

Answer: We can wise use natural resources by reducing the use of energy, and by reusing and recycling materials and by changing our behavior.

4.

Answer: A resource that is not made by nature but made by people. Such as: Paper, glass etc.

5.

Answer: Man made resource come from nature. For example: Man produce glass from silicon. This glass is a man-made resource.

6.

Answer: Oil, coal and natural gas are non-renewable resources. They cannot be replaced for millions of years once used. So, we should use them wisely.

7.

Answer: Two importance of natural resources-

- a) Renewable resources cause less carbon emission.
- b) Renewable resources can be used as alternative resources.

8.

Answer: I will suggest Sunlight or wind water

9.

Answer: Natural Resources is a resource found in nature that people can use to meet their need such as: Sunlight, Wind etc.

10.

Answer: Deforestation and exclusive use of fossil fuel are two effects of population growth.

11.

Answer: Two artificial resources are:

- a) Plastic
- b) Glass

12.

Answer: Two non-renewable resources are:

- a) Coal
- b) oil

13.

Answer: The sources of renewable resources are unlimited. As a result, this resource can be used again and again. On the other hand, non-renewable resources are limited. For example oil, natural gas, coal etc. If we use renewable resources like sunlight, wind, river current etc. reducing the use of non-renewable resources, the non-renewable resources will not be used up rapidly. Besides use of non-renewable resources pollutes the environment heavily. For this reason, renewable resources become alternatives to non-renewable resources.

14.

Answer: The reasons why people need to use natural resources wisely are-

- a) We depend on natural resources for producing energy and new things.

- b) The demand for natural resources is increasing with the growing number of populations.
- c) But some resources like oil, coal, natural gas are limited.
- d) Modern life will come to a halt without natural resources.
- e) These resources may be completely exhausted very soon.
