

Exercise Sheet -3

Date:04.06.20

- 1) There are 6 benches in the class, 4 students sit on each bench. How many students are there?
- 2) A shopkeeper puts 3 tomatoes on each of 5 plates. How many tomatoes are there altogether?
- 3) There are 2 apples on each of 6 plates. How many apples are there altogether?

Solution

1) 1 bench 4 students

6 benches (4×6) students

=24 students

Ans: There are 24 students.

2) 1 plate has 3 tomatoes

5 plates has (3×5) tomatoes

=15 tomatoes

Ans: There are 15 tomatoes altogether.

3) 1 plate has 2 apples

6 plates has (2×6) apples

=12 apples

Ans: There are 12 apples altogether.
