Let-8

6.5 persons sit on one bench. How many benches will be necessary for 45 persons?

Sol^n:

5 persons sit on 1 bench

So, 45 persons sit on (45÷5) benches

=9 benches

Ans: 9 benches

7. A man bought some eggs and paid 32 Taka. If the price of one egg is 4 taka, how many eggs did this man buy?

Sol^n:

In 4 taka a man bought 1 egg

So, In 32 taka a man bought (32÷4)eggs

=8 eggs

Ans:8 eggs.

8. 8 students make a group in each. If there are 72 students , then how many groups will be there?

Sol^n:

8 students make 1 group

So, 72 students make (72÷8)groups

=9 groups

Ans: 9 groups.

NB: "Do the exercise according to your capacity."
