

## Exercise Sheet-11

Date- 18.06.20

1. There are 12 benches in a classroom. 6 pupils can sit on a bench. How many pupils can sit in total in the classroom?
2. Sima wants to buy 7 books, and each book costs 25 taka. How much does he pay?
3. Father walks 4 hours daily. How many hours does he walk in 12 days?

### Solution

1.

In 1 bench 6 pupils

Therefore In 12 benches  $(6 \times 12)$  pupils

=72 pupils.

Ans: 72 pupils.

**2.**

**1 book costs 25 taka**

**Therefore 7 books cost  $(25 \times 7)$  taka**

**=175 taka**

**Ans: 175 taka**

**3.**

**1 day father walks 4 hours**

**Therefore 12 days father walks  $(4 \times 12)$  hours**

**=84 hours.**

**Ans: 84 hours.**
