Class -3

Chapter – 6

Protecting Our Environment Against Pollution

Topic -3, Preventing Pollution And Protecting The Environment.

Now we know the causes of pollution and the effects of pollution. So we have to be careful that the environment around us does not become polluted. We should take action to stop it.

Preventing pollution :

- a) We should not spit, cough or excrete in public place.
- b) We should keep our houses, roads and play grounds clean and look after them.
- c) We can throw our rubbish in proper places, not in streams or dumps or the street.
- d) Reduce emitting from factories ,vehicles.
- e) Reduce use of fertilizers and pesticides.

Protecting Our Environment :

- a) Creating public awareness.
- b) Planting more trees.
- c) Reducing the plastic usage.
- d) Creating environmental programmes.

Importance of protecting our environment :

A clean environment is essential for healthy living. A healthy environment makes the lives beautiful of humans and other animals. An unclean environment leads to a bad condition of a society ,arrival of diseases and many more. So if we want a better and healthy life we all should try together to keep our environment clean.

Give short answers:

Where should we drop rubbish?

Give long answers:

1. Why should we preserve our environment?
2. How is environment polluted?

Answer of s/q :
