Chapter-Nine (Population and development of Bangladesh)

Creative question:

1. Population and development are interrelated. The population of Bangladesh is more than land. If we compare the population of a developed country like America, we see that there 36 persons live in per sq. km. In Bangladesh 1240 persons live in per sq. km. (World Bank 2018). It is impossible for an over populated country to be developed.

- What is the per capita income of America?
- What is the need of population policy?
- How does population create barrier in the development of Bangladesh? Explain.
- Analyze the strategies for converting population into human resource.

2.

A	B
Alleviating of illiteracy	Health of mother and child.
Expansion of female education	Immunization
Healthy and family welfare work	Stop child marriage
Registration and employment	Consciousness to motivate
