## Our World

Date:12.10.20

Before we knew that there are 8 planets in Solar System. Earth is one of the planet of Solar System and this Earth is our world.

## Earth

Total land surface area of Earth is 29%. This land surface is divided in 7 parts. Each part call continent. Then these 7 continents are as bellow:

1. North America.
2. South America.
3. Europe.
4. Africa.
5. Asia.
6. Oceania
7. Antarctic.

**1. North America:** It is a continent in the north side of our world. It is 3<sup>rd</sup> largest continent of our world. It is made up of 23 different countries.

## **North America**

**2. South America:** It is a continent in the south side of our world. It is 4<sup>th</sup> largest continent of our world. It is divided in 12 countries.

## South America

**3. Europe:** It is in the north side in our world. It is 6<sup>th</sup> largest continent. Here have 44 countries.

## Europe

**4. Africa:** It is 2<sup>nd</sup> largest continent of our world. It is divided in 54 countries.

## Africa

**5. Asia:** It is a largest continent of our world. Here have 49 countries. Bangladesh is a country of Asia.

## Asia

**6.Oceania:** Oceania is the smallest continent of our world. Here have 14 countries and thousand islands.

## Oceania

**7. Antarctica:** It is 5<sup>nd</sup> largest continent of our world. It is south most continent and ice covered landmass.

## Antarctica
