Class-4, Subject- Science  
Chapter-10, Lecture-1 (Answer)  
Date- 21/10/2020

1.

Weather components are: a) sky conditions,

b) temperature,

c) humidity, and

d) wind

2.

Humidity is the amount of water vapour in the air. When the amount of water vapour is more in the air, we sweat very easily. Again, when the amount of water vapour is less in the air, then we feel dry.

3.

The condition of what the sky and air like each day is known as weather.

4.

The heat from the sunshine is the main factor to change the weather.

**Fill in the blanks:**

- a) Climate
- b) Big drops
- c) Winter
- d) Rainfall
- e) Forests
- f) Lighter
- g) Moisture
- h) Direction
- i) Wind
