

1.Fill in the blanks with appropriate words:

- a) Recycling
- b) Energy
- c) Non-renewable
- d) Behaviour
- e) Farm livestock

2.Match the following words from column A with column B by using hyphen and write it in your answer script

- a) Zircon, limestone are-some example of hard rocks found in our country
- b) In our country solar panels are built-on the roofs of the houses for producing electricity.
- c) We can produce heat-by burning fossil fuel.
- d) Writing on both sides of the paper is a good practice-of conserve natural resource.
- e) Oil, coal, and natural gas are-known as fossil fuel.

3.Answer the following questions in short:

- a) We have five kinds of natural resources. Such as- Natural gas, Silicon
- b) Sun is an important source of renewable energy. We get heat from sun. We also can produce solar panel to produce electricity from sun.
- c) A non-renewable resource is a natural resource that cannot be replaced or reproduce by nature once it has been used up. Example: Natural gas, oil, coal, minerals etc.
- d) Oil, coal and natural gas are used in producing urea fertilizer.
- e) Anything that can be used to produce energy is called an energy resource. Sunlight, wind, water current, oil, coal and natural gas are energy resources.

4.Answer the following broad question:

Conservation:

Conservation is the preserving and wise use of natural resources. We can conserve natural resources in many ways. Such as:

Reducing the uses of resources:

We can conserve natural resource being economical. For example: we can turn out gas burner after cooking.

Reusing Resource:

Prepared By
Lamyea Alam
Assistant Teacher (Science)
Chapter-7 (CHT answer sheet)

We can reuse paper by making bag with it. If we can reduce trash than we can save our natural resources. If anything broken then we should try to fix it and reuse it again instead of buying it again.

Recycling Resources:

We should recycle our old material and make new things. For example: we can make paper bag with the help of old paper and use it again. It can reduce the number of trees cut down.

Using renewable resource:

We should produce electricity from renewable resources. Example: solar electricity.

Changing behavior:

We should change our behavior for conserving our natural resources.
